DETAILED ACTION

Allowable Subject Matter

1. Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

2. The following is a statement of reasons for the indication of allowable subject matter:

As per dependent claim 3, the claim features pertaining to a set of E reference speakers is not transformed in an eigenspace before any comparison but is used with all the parameters of the GMM model, is not explicitly taught by the prior art of record.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1,2,7-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Kuhn et al (6697778).

As per claims 1,7,12, Kuhn et al (6697778) teaches analyzing vocal signals of a speaker using probability densities between reference signals and an input signal and analyzing the probability densities (col. 2 lines 1-10; col. 2 lines 41-55; col. 4 line 34 – col. 5 line 10, wherein during the training aspect of the models, the reference data does not contain the speaker - fig. 4, subblocks 44-56).

As per claims 2, Kuhn et al (6697778) teaches Gaussian mixtures with weighting coefficients of dimension D and E reference dimension (Figs. 1,3,5, and col. 9 line 35 – col. 10 line 23).

As per claims 8-11, Kuhn et al (6697778) teaches the analysis of audio information over the telephone (col. 1 lines 18-25), along with speaker identification/verification (col. 1 lines 33-42).

Response to Arguments

5. Applicant's arguments filed 5/23/08 have been fully considered but they are not persuasive. Applicants amendments to the specification and the claims have overcome the objections to the title, drawings, and 35 U.S.C. 101 rejections. As per applicants arguments

against the Kuhn reference, in particular, the amended claim language pertaining to an independent speaker set, examiner disagrees and argues that 1) applicants specification uses the reference set for speaker identification (and hence needs to have the user as part of the data set), and 2), the Kuhn reference teaches speaker sets that contain references that are not the speaker (the training phase for a new user - the datasets do not contain the speaker - Fig. 4, subblocks 44-56). However, examiner notes that the Kuhn reference does not explicitly the same claimed technique as presented in claims 3-6.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
